Name _____

# Galaxies

**Student Datasheet ...**

- What's a galaxy?

- How did we find out that our galaxy wasn't the only one?

- What did the discovery of other galaxies tell us about the size of the Universe?

**Something else to think about…**

While the discovery of other galaxies made the Earth seem much smaller, it also made dreamers and scientists out of many young people. The true size of the Universe has stretched our imaginations with unlimited possibilities.
