

ISIS Users Can Now Choose

ISIS users at the University of Arkansas can now personalize the primary home page that opens when they log into the student information system. And that change can be made at any time by typing one simple word.

Previously, the ISIS start page was based on a user's security. While the system can still make that determination, users now have the option to select a specific page to open. For example, a staff member who is also a student can now select a page other than the Student Center to open upon login.

ISIS users can change the start page as often as they wish. The process is easy: navigate to the preferred entry page, click Add to Favorites, highlight the designated page name, and type START in the field. Users can find detailed instructions for personalizing their ISIS start page on the [My Favorites/Start Up ISIS Assistant](#).

For more information about personalizing the start page or any ISIS matter, please e-mail isishelp@uark.edu.
