

Disable Pop-Up Blockers

Users running Windows XP Service Pack 2 may experience difficulty with certain applications, such as ISIS, due to the blocking of pop-ups. The following instructions will enable pop-ups from the University of Arkansas Web sites.

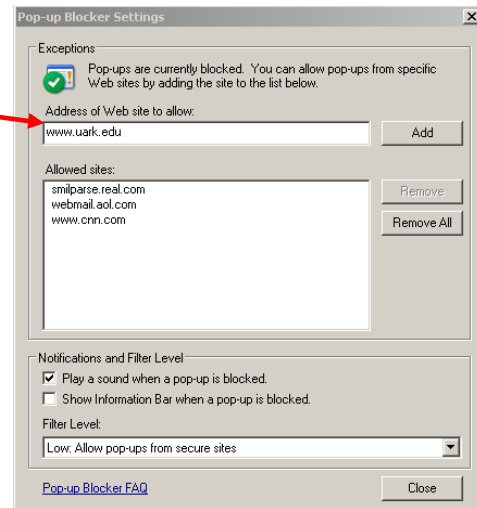

1. Click the **Internet Explorer** icon to open your Web browser.
2. Navigate to the top of your browser and click **Tools**.
3. Click **Internet Options** in the drop-down menu.

4. Click the **Privacy** tab.
5. Check the **Block pop-ups** checkbox.

NOTE: If you do not have the Pop-Up Blocker section on the Privacy tab, this indicates that you do *not* have Service Pack 2 installed and, therefore, do not need to follow these instructions.

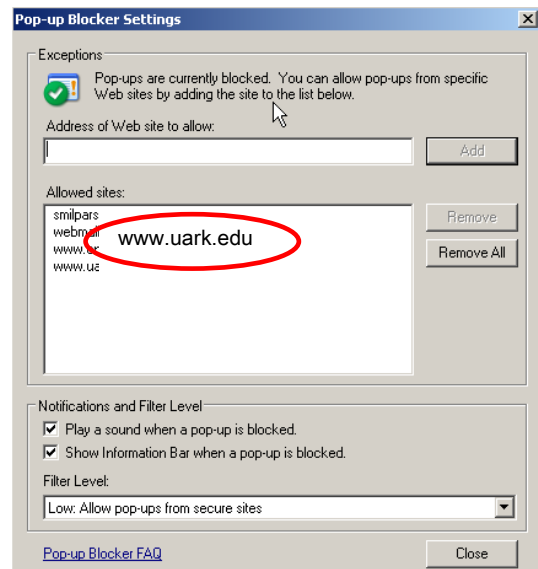

6. Click the **Settings** button located at the bottom of the window.

7. Type **www.uark.edu** in the **Address of Web site to allow** field.
8. Click the **Add** button.

NOTE: You should now see **www.uark.edu** in the **Allowed Sites** field.

9. Make sure there is a check in the box for **Show Information Bar when a pop-up is blocked**.

10. Click the **Close** button.
11. Click **OK**.
