

Faculty Salary Distribution Report

This continuing report is required to establish a database of faculty salary increments by source and type to be used for budget planning and analysis. It will also be used to verify information in the university's personnel accounting system used in providing salary information for external surveys and reports.

This report will be submitted annually when salaries are set for the coming year and shortly after salaries are submitted to Finance and Administration. A memorandum and reporting form will be mailed each fall to the deans, with instructions and due date to the Office of Institutional Research.
