Global Studies Program

Global Studies Program

The Dale Bumpers College of Agricultural, Food and Life Sciences offers a variety of international opportunities for its students to study abroad. The centerpiece is the Global Studies Program, headquartered in the Scottish Agricultural College (SAC) in Edinburgh. SAC is Scotland's National College for Food, Land and Environmental Sciences. Opportunities for Bumpers College students are now available throughout Europe.

While the major focus is on undergraduate student opportunities, graduate students also are encouraged to participate during their graduate study period or immediately after receiving their degree. Scholarships and Travel Awards are available on a competitive basis to help cover the cost of each study program.

Bumpers College also offers a new minor in Global Agricultural, Food and Life Sciences. With advanced planning, both the minor and study abroad experiences offer an international component to a student's major.

Oban Harbour, Scotland

Options

The Global Studies Program is specifically tailored to meet the individual needs of each student. This flexibility forms the hallmark of the program. Projects may involve directed study or internships in such areas as agricultural business, agricultural sciences, hospitality and restaurant management, horticulture, human health and nutrition and interior design.

▼ Internships

Lengths of internships vary but usually involve six to 12 weeks in a European country. These may be prearranged independent studies or internships directed by faculty at the University of Arkansas in cooperation with a university or agency in Europe.

▼ Semester

Longer programs are designed to give students a full semester of study abroad in their field of interest and in their country of choice. Students enroll for UA study abroad credit, and the courses transfer to the University of Arkansas. Planning in advance with their adviser allows students to build a strong academic transcript.

▼ Year

This option is essentially the same as the semester option, in which courses taken abroad are transferred back to the University of Arkansas. Special planning is required so that all credit hours earned abroad are transferable to the student's degree program.

▼ Study Tours

Individualized study visits for two to four weeks can be arranged for one student or a group of students, coordinated by the resident director in Edinburgh. Specific student responsibilities are planned in advance with their University of Arkansas faculty adviser to complement the student's field of study and to earn academic credit.
