- 1) Cymbals, you are the ride, crash, and hi-hat of our marching drumset unit. This makes your job very important when considering timing. If every note is not in its place, then the groove gets disrupted. So make sure to work this with a metronome and the recording.
- 2) I will get you a key as soon as possible. Until then, I have marked every sound with its appropriate name.
- 3) When split is written, we will split you guys into two groups and have each unit play every other note.
